Lomax developed a passion for American folk songs that ultimately made him one of the foremost authorities on this fundamental aspect of America. A cross many decades and throughout the country, Lomax and his informants created over five thousand recordings of America's musical heritage, including ballads, blues, children's songs, fiddle tunes, field hollers, foxhounds, and popular songs. He acted as honorary curator of the Archive of American Folk Song at the Library of Congress, helping establish the field of folk song scholarship in its current form. The invention of the speculum, J. Marion Sims, is celebrated as the "father of modern gynecology," and a memorial at his birthplace honors "his service to suffering women, empress and slave alike." These tributes illustrate the fact that Sims achieved his surgical breakthroughs by experimenting on eleven enslaved African American women. Today, the names of all but three of these women are lost. In 1992, Poems, Kinya J. Agin gives voice to the enslaved women named in Sims’ autobiography: Amos, Bathey, and Luf. In poems exploring imagined memories and experiences relayed from hospital beds, the speakers challenge Sims’ lies, mourn their transplanted dignity, name their suffering in speech, and speak of their bodies as "freed fruit." At the same time, they are more than their victims, their human feelings, their memories, and their selves. A finalist for the AWP Association of Writers and Writing Programs Donald Hall Prize for Poetry, this debut collection illuminates a complex and disturbing chapter of the African American experience.

Encyclopedia of Emancipation and Abolition in the Transatlantic World

In this ambitious project, historian Katrina Thompson examines the conceptualization and staging of race through the performance, sometimes coerced, of black dance from the slave ship to the minstrel stage. Drawing on a rich variety of sources, Thompson explores how black musical performance was used by white Europeans and Americans to justify enslavement, perpetuate the existing racial hierarchy, and mask the brutality of the domestic slave trade. Whether on slave ships, at the auction block, or on plantations, whites often used coerced performances to oppress and demean the enslaved. A 19th-century "backstage" use of musical performance often served quite a different purpose. Through creolization and other means, enslaved people preserved some natively musical and dance traditions and invented or adopted new traditions that built community and even aided rebellion. Thompson shows how these traditions evolved into nineteenth-century minstrelsy and, ultimately, raises the question of whether today’s mass media performances and depictions of African Americans are as far removed from their troublesome roots.

The Coolie Speaks

This volume takes up the challenges of linking the focused campaigns and insights from African American campaigns for emancipation with the perspectives of this global group of environmentally marginalized groups. The editorial team has drawn on the Washington’s work, on Paul Rosler’s study of Native American environmentalism, and on Noether Coogan’s "world to seek out wider perspectives on the relationships between criminals (questions of injustice and demands for environmental justice in the global arena. Due to the supposedly losing war that Christianity has fought against its decline for the last one hundred years, Christians seem to have entered a sort of "singe mode," they are afraid that acceptance of "liberal ideas" about women, homosexuals, and the transgender community is a part of the increasing moral decadence of our society. The use of irony in music is just beginning to be defined and critiqued, although it has been used, implied and declared by composers, performers, listeners and critics for centuries. Irony in popular music is especially worthy of study because it is pervasive, even fundamental to the music, the business of making music and the politics of messaging. Contributions to this collection address a variety of musical ironies found in "the notes themselves," in the text or subtext, and through performance, reception and criticism.

The New York City Labor Census (NY Clc) was the first group of its kind when it formed in 1985 with members of different unions joining together in song, Song, Struggle and Solidarity. The New York City Labor Census in its Twenty-fifth Year is the product of Mark Abood’s anthropological research on the NY Clc during its calendar year from fall 2010 to spring 2011. Abood was in his sixth year as an active member of the chorus at that time. He kept field notes of nearly every NY Clc performance and weekly rehearsal during the year. He also interviewed twenty-eight of the approximately eighty-five members and studied documents in the group’s history. Chapters include a history of singing in the labor movement in the United States, the history of the NY Clc in its first twenty-four years, and a focus on developments during the group’s twenty-fifth year. The book ends with the author’s conclusions on the NY Clc’s accomplishments, challenges, and possibilities.

Sexuality and Slavery

The time of slavery was often one of escape and freedom. The life of a slave in the South was a hard one, full of trials and tribulations. Despite the harsh conditions, some slaves were able to find a sense of freedom and independence. The Northern states, especially Massachusetts, provided a haven for runaway slaves. The Underground Railroad, a network of secret pathways and safe houses, helped many slaves escape to the North and freedom. Despite the dangers and risks involved, many slaves were willing to take the chance and risk everything for the freedom they longed for.

During the Great Depression, Henry Alsberg, a journalist with a passion for social justice, directed the Federal Writers' Project, a New Deal program of the Works Progress Administration. Under his guidance, thousands of unemployed writers were hired to help create a body of work that would document the history and culture of the American people. The project produced more than 1,000 publications from 1935 to 1939, including the still highly acclaimed American Guide series. Some writers, such as Richard Wright, went on to become national literary figures.

This collection of eleven original essays interrogates the concept of freedom and renews our understanding of the process of emancipation. To define freedom, and what did freedom mean in nineteenth-century African American, both during and after slavery? Did freedom just mean the absence of constraint and a widening of personal choice, or did it extend to the ballot box, to education, to equality of opportunity? In examining such questions, rather than defining every aspect of postemancipation life as a new form of freedom, these essays develop the work of scholars who are looking for belonging to an empowered government or community. The conceptualization of community defined the outcome of emancipation. Some essays in this collection disrupt the traditional story and time-frame of emancipation. Others offer trenchant renderings of emancipation, with new interpretations of the language and politics of democracy. Still others evoke ideological academies to speak passionately about the politics of emancipation. Historiography, recounting how historians have used source material for understanding the lives of African American women and children, is to the question of freedom—its contested meanings, its social realities, and its beneficiaries—remains central to understanding the complex historical process known as emancipation. Richardson, Ronald M. Shaffer, Theresa M. Towne, Terrence T. Tucker, Daniel Cross Turner, Linda W. Watkins, and Ellen Weintraub, Mississippi is a study in contradictions. One of the richest states when the Civil War began, it emerged as possibly the poorest and remains so today. Geographically diverse, the state encompasses ten distinct landform regions. As people traverse these, they discover varying accents and divergent outlooks. They find pockets of inhospitable wealth within a landscape grinding poverty. Yet the most literate, disadvantaged state has produced arguably the nation's rich literary legacy. Why Mississippi? What does it mean to write in a state of such extremes? To write of rural and economic relations so contradictory and fraught as to defy any topic? William Morris often quoted William Faulkner as saying, To understand the world, you must first understand a place like Mississippi. What makes (or more likely M erle Ellis) points is that M ississippi is not separate from the world. The country fascination with Mississippi periods because the place embodies the very conflicts that plague the nation. Beyond Freedom

Through an examination of various couples who were forced to live in slavery, Rebecca J. polymer argues that slavery found ways to conduct successful courtship relationships. In its focus on the processes of courtship among the enslaved, this study offers further insights into the meanings that structured intimate lives. Establishing their courtships, often across plantation lines, the enslaved men and women of antebellum North Carolina worked within and around the slave system to create and maintain meaningful personal relationships that were both in and apart from the world of the plantation. They claimed the right to participate in the social affairs of community and, in the process, challenged and disrupted the southern social order in discourse and covert acts of defiance. Informed by feminist conceptions of gender, sexuality, power, and resistance, this study argues that the courtship relationship afforded the enslaved a significant social space through which they could cultivate alternative identities to those which were imposed upon them in the context of their daily working lives.
